

Introduction to aquaponics	5
What is aquaponics?	5
Water issues	5
History of aquaponics	6
The aquaponics system	7
Requirements & management	7
The three elements of aquaponics	9
The 1- 2 - 3 closed system	10
Fish - Bacteria - Plants	10
The Nitrogen Cycle - in detail	10
Types and styles of Aquaponics systems	14
The Gravel bed system	14
The Floating Raft system	15
The NFT (Nutrient Film Technique) system	16
Pros and Cons of the three systems	16
Building your own system	18
Adding fish	22
Choosing a type of fish	22
When to add fish to the system	23
How to add fish to the system	23
Where can I get fish from?	24
Water quality	24
Water tests	25
When to add plants	29
What types of plants?	29
How to prepare plants and grow from seed	30
System maintenance	32
Water temperature:	32
Water quality	32
Fish stress	33
Moving plants around	34
Growing and harvesting	35
When can I harvest fish?	35
How do I kill fish humanely?	35
Summary - aquaponics basics	37
