

Appendix A

Goldfish	
Size:	40-50 cm
Weight:	Up to 1kg
Life span:	10 years+
Optimum water temp:	16°C - 24°C
Will survive in water:	>8°C
Fish stops feeding:	<6°C
Fish die:	<6°C
pH ideal:	7.0-7.5
pH tolerant:	6-8
Hardness:	>150ppm
Food:	Goldfish will consume almost anything. The kind of food goldfish will eat includes flakes, cooked peas, and insect larvae. Flake food often is preferred over pellet food due to the fact that they are easier for the goldfish to see and to clean after.
Habitat:	Goldfish live in ponds, or small lakes of fresh water
